CAMPING VILLAGE

WELCOME

WELCOME TO US !

The Mediterranean as we like it!

This year again, the Méditerranée Plage campsite will be the place of relaxation and good humour that many of you are waiting for!

In order for this haven of joy to endure, we have been vigilant for several years now, and even more so today, about the preservation of our water resources, the use of energy and the management of our waste.

We are convinced that you are not insensitive to these new ecological challenges. This is why, this season, we are betting that together we will reduce our environmental impact thanks to the various actions we will be taking (see p.8).

Your holidays will be even more beautiful

Enjoy your stay at Méditerranée Plage!!

WASTE MANAGEMENT

*Short supply circuits,
energy, water,
recycling...
everything counts !*

We have been striving at Méditerranée Plage for several years to apply a principle that is dear to us: Respect for our planet.

The catchphrase *my campsite ♥ my planet* is the leitmotif that signals the actions or places going in the direction of this approach.

Some actions carried out within our campsite:

- **Recycling** place for Technical Service
- **Recycle bins** in mobile homes,
- Shower faucets for **water saving**,
- **Laundry** with machines to **ecological standards**,
- Provision of **eco-labeled** detergent and soap,
- **Charging stations** for electric cars,
- **Training** of campsite staff in **environmental issues and eco-gestures**,
- Creation of a shop with **local products** and **short supply circuits**,
- Restaurants that are committed to an **environmentally friendly** approach.

This year, we're getting into **composting**. A bet on everyone's commitment to **transforming our food waste into biological nutrients** for our soils (see page 13).

ELECTRIC CHARGING

*Changing your vehicle:
Charging station
mandatory*

For some time now, we have been installing **charging stations** for your electric vehicles. It is essential to only use these terminals for your vehicles.

The use of the sockets of your mobile home or pitch is prohibited and exposes you to risks of fire.

CONSUME LESS, AND SO MUCH COMFORT

*You make
the difference!*

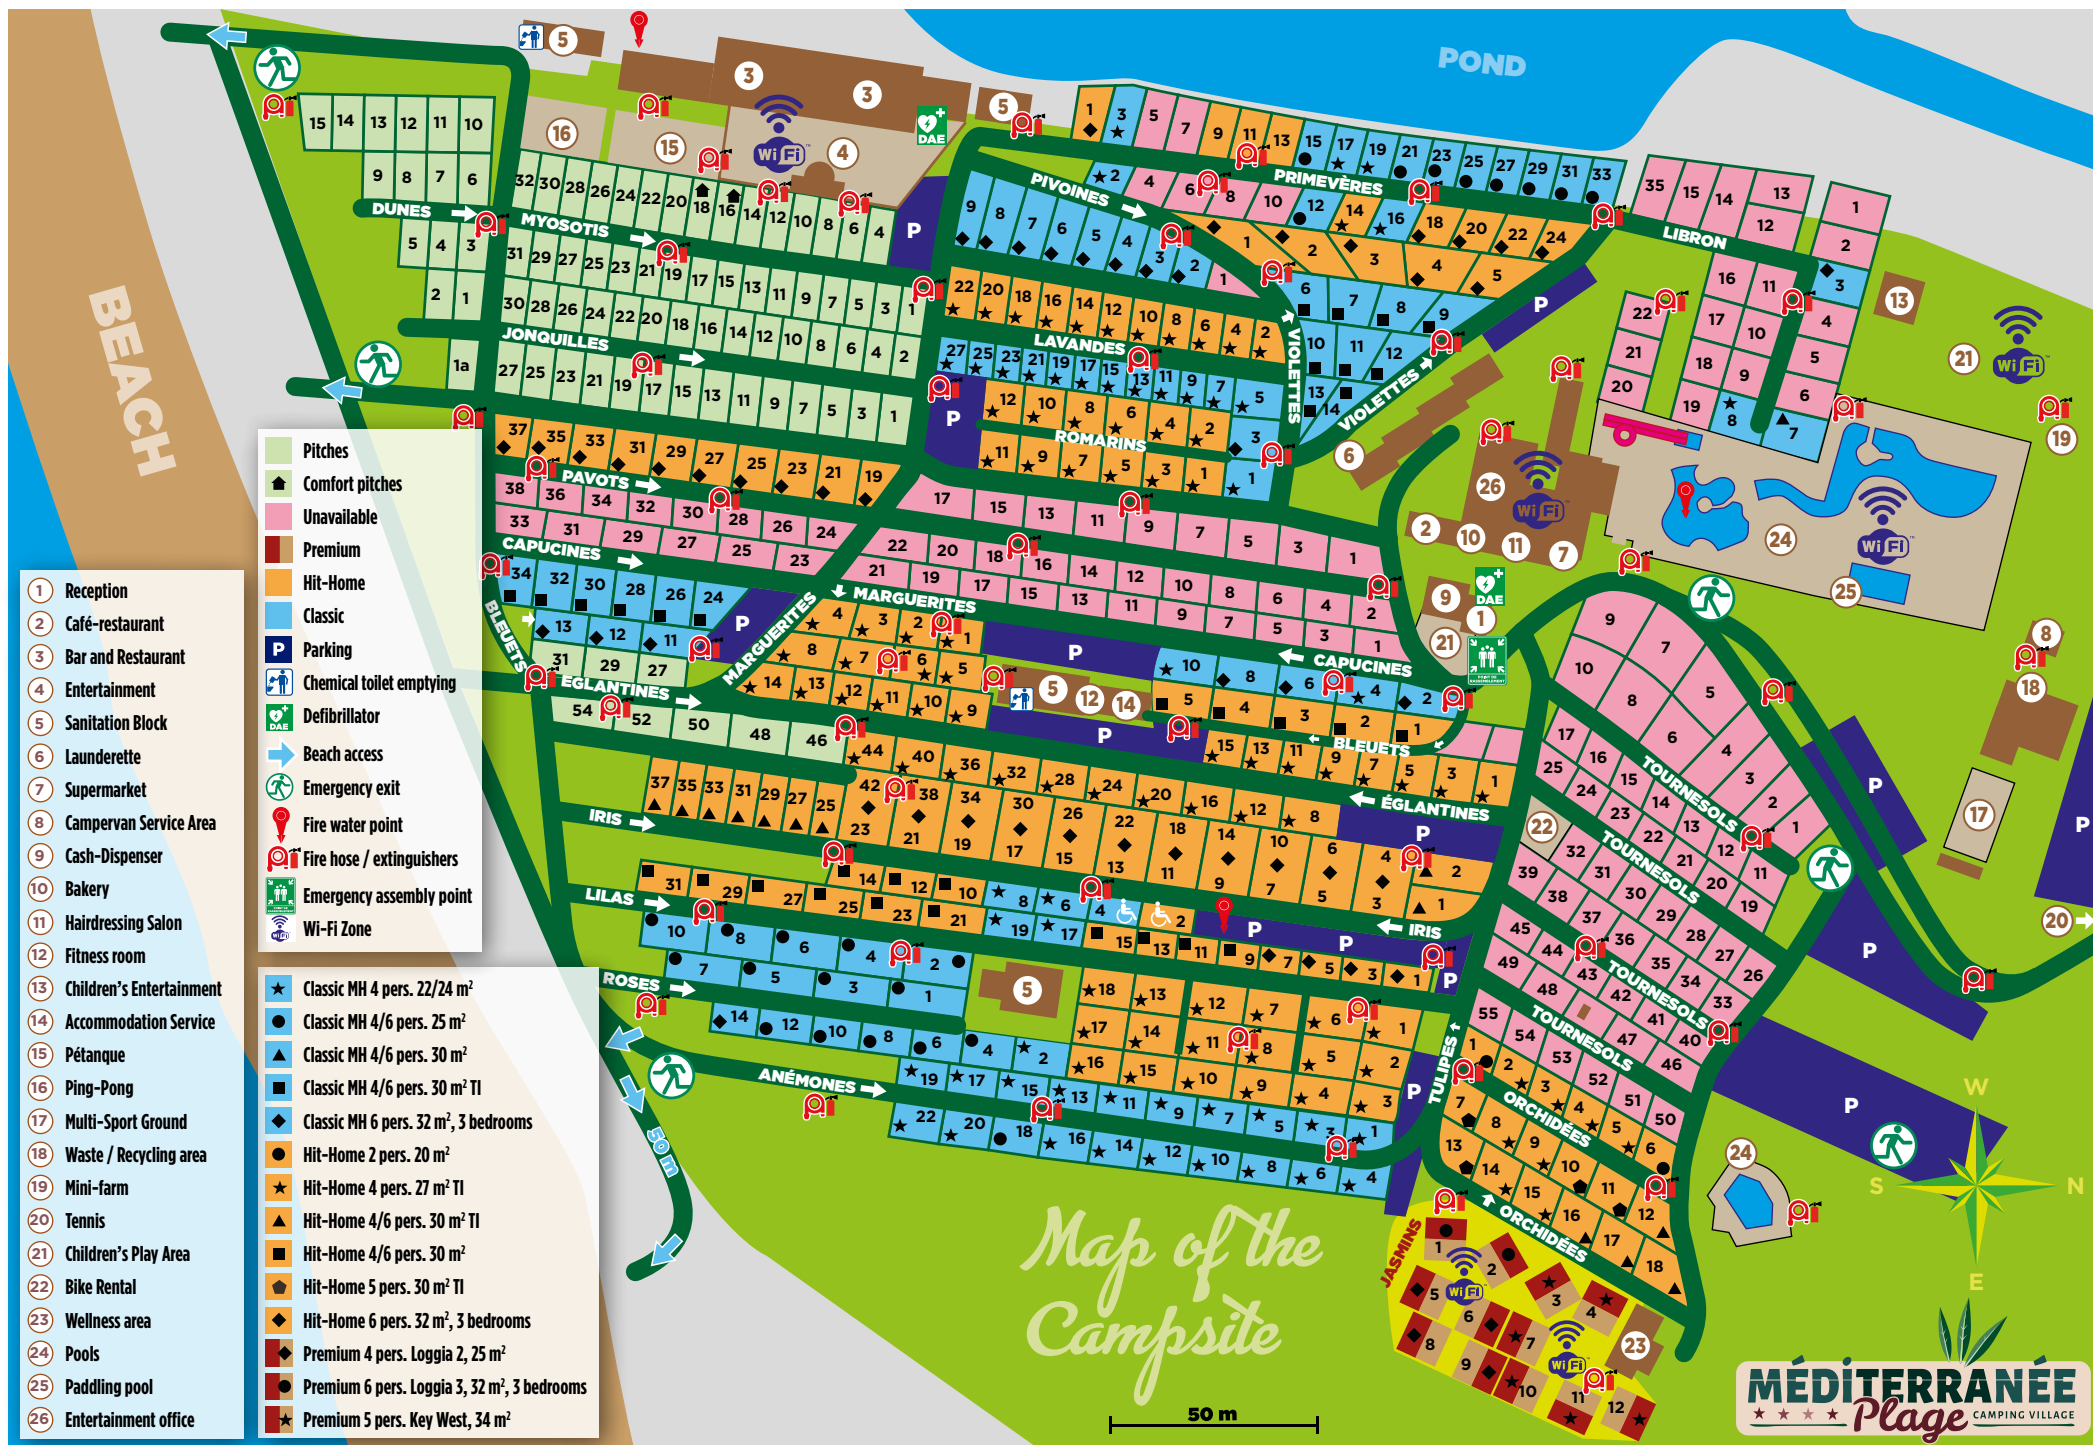

Although holidays are a time for relaxation and carefree living, we rely on everyone's **commitment** for today's environmental issues.

This year, **water** is obviously at the top of our list of concerns. Our campsite is fed by a water table that has been **weakened** this year. In order to preserve this **precious resource**, we have postponed the opening of some of the pools until the end of May.

We therefore ask you to **manage your water consumption**, particularly with regard to the duration of showers and taps that run unnecessarily. Of course, **washing vehicles is totally forbidden**, and the use of the **hosepipes** is strictly **reserved for fire emergencies**.

On the other hand, as energy costs have exploded, we ask you to be reasonable on the use of air conditioning:

Do not leave the air conditioning on when you are away from the mobile home (10 minutes is enough to lower the temperature) and **limit the exaggerated temperature differences** between the outside and inside.

COMPOSTING OF ORGANIC WASTE

*Let's give a second life
to our food residues*

Together, we can make an even greater contribution to the reduction of waste and its recycling.

This year, as a first experiment, **compost buckets** are available in some mobile homes. If you wish to participate and for those whose rentals are not equipped, you can get them at the reception.

A few precautions as shown in the following illustration will help you to fill your compost bucket with the best food residues! Afterwards, all you have to do is go to the compost area ⁽¹⁸⁾ to make **quality compost** together, which will contribute to nutrient for our fields and other local cultivations!
